

## BRINGING EUROPE & LATAM CLOSER

### A unique transatlantic submarine cable system directly connecting Europe and Latin America

In service since June 2021, the EllaLink system carries **100 Tbps across the Atlantic**, with the lowest latency between Portugal and Brazil on a totally diverse route. Upon completion of ongoing branches construction in French Guiana and Mauritania, **the cable will stretch 9,400 km.**

#### Secure

Direct intercontinental access between Europe and Latin America reinforcing data privacy and sovereignty.

#### Fast

Up to 50% latency reduction between Latin America and Europe with direct City-to-City connectivity.

#### Diverse

A unique diverse route geographical diverse from existing submarine infrastructure in the Atlantic ensuring reliability and security.

#### Open

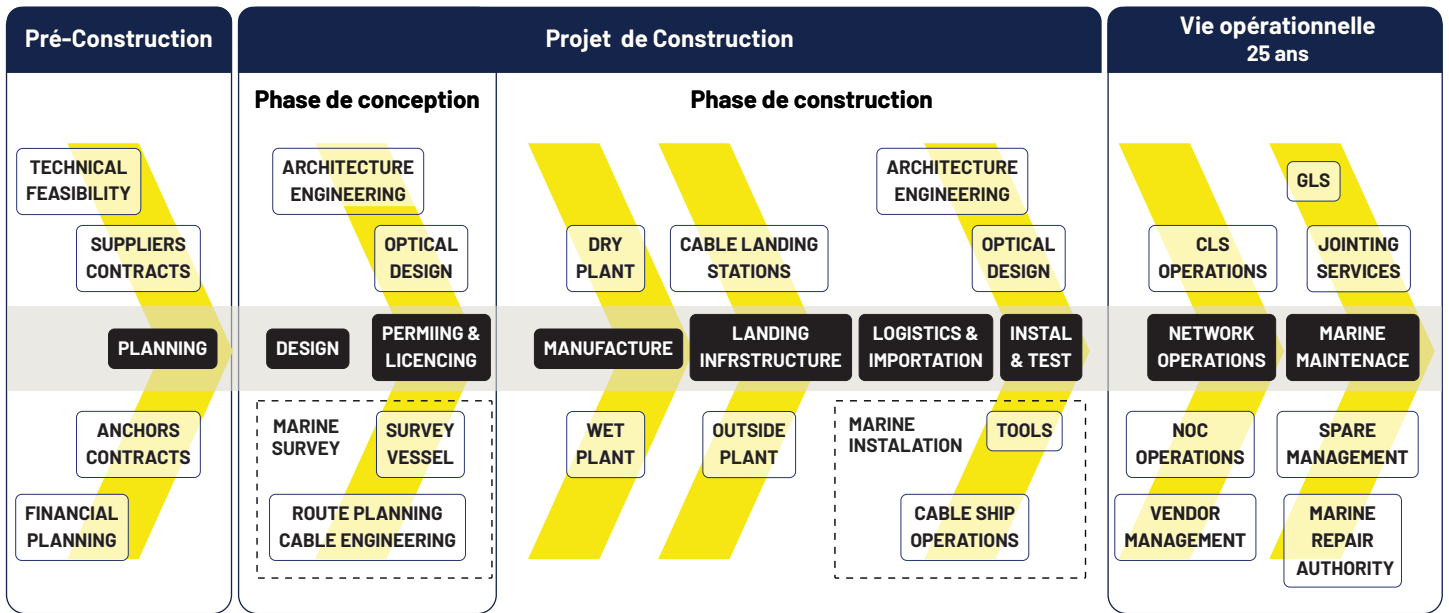

Carrier Neutral and Open Access operator, designed to meet the growing demand for data transfer, enabling seamless connectivity for businesses and individuals.

# Desenvolvedora e operadora de infraestruturas inovadoras

Com base na experiência de sua equipe e em sua infraestrutura existente, a EllaLink cria soluções flexíveis e sob medida para gerir todo o ciclo de vida das infraestruturas submarinas para seus clientes.

EllaLink's design enables direct and secured international branch connectivity that enable the gradual development and integration of new markets, improving local reach with a global impact.

## Key achievements

- Madeira, Cape Verde, Morocco branches and connectivity comprehensive solution
- BELLA (research and education consortium) transatlantic spectrum
- Geolab and Submarse scientific collaboration projects
- Branching units agreements with the states of Para and Maranhao

## In construction

- Branches to Nouadhibou (Mauritania) and Cayenne
- Both projects are co-funded by public and european funding in particular the digital strand of the Connecting Europe Facility Programme (CEF-Digital)

## In development

- Branches construction projects to connect the underserved Brazil's Amazon region in the State of Pará and the State of Maranhao
- Sines Atlantic hub landing infrastructure, with up to 12 cables

EllaLink is a privately funded and independent company committed to providing products and services on a Carrier Neutral and Open Access basis. Marguerite II, a pan-European equity fund active in the renewables, energy, transport and digital infrastructure sectors, is the main shareholder of EllaLink.
